## **Instructions for using T.A.S.C.O/Rittel's Bactericide**

**Catalog #PS-650**

T.A.S.C.O/Rittel's Bactericide is an effective bactericide and fungicide. Unlike phenol, it only has a persistency of 8 months. It is an excellent phenol substitute. A bactericide is best used in your relaxing bath prior to pickling. It kills any bacterial growth, and protects it as it relaxes.

**For use in your Relaxing Bath** – Add 1 fl. oz. of PS-650 for each 16 lbs. of skins. This same dosage can also be used throughout the process.

**In high humidity and Temperatures** – Some tanners like to treat the skins with bactericide before salting. To use as a spray, mix 1 pint of PS-650 to 10 pints of water. Lightly spray the flesh and hair side of the skin, and then apply salt.

### **CAUTION**

Eye and skin contact should be avoided when handling PS-650. Use rubber gloves and goggles when pouring and handling. Wash thoroughly with soap and water after handling. Do not discharge PS-650 solutions into lakes, streams, ponds, or public waters. PS-650 is toxic to fish.

### **First Aid Instruction's**

If in the eyes, flush them with plenty of water. Get medical attention. IF on the skin, wash with plenty of soap and water. Get medical attention. FI swallowed, drink promptly, a large quantity of milk, egg whites, gelatin solution or if none of these are available, drink large quantities of water. Avoid alcohol. Get medical attention. Note to Physician: Probable mucosal damage may contraindicate gastric lavage.
